Toxins, particularly from snake venoms, have also been used extensively to develop assays for both pathological haemostatic conditions and for levels of coagulation factors. This is an active area with new assays being continually developed. Vascular endothelial growth factor-like proteins are common components of snake venoms and may function by inhibiting the physiological receptors. This is

Determining that the immune system is the cause of a dog's decreased platelet count can be difficult. These clinicians walk you through the diagnostic and treatment process so you can help patients with this life-threatening bleeding disorder.

Clostridium perfringens toxins (type A, B, C, D, E ...

Significant progress has been made in characterizing alpha and theta toxin, and the enterotoxin, but relatively little is known about the other toxins. A variety of disease syndromes are believed to be caused by one or more of each of these toxins though their exact role in disease is not clear in most cases.
